

Converting your protocol into a full review: right click on 'Intervention review' in the left hand panel. Select 'Properties'.

Click on 'Full Review'.

The screenshot shows the Review Manager 5.3 software interface. The main window displays the review page for 'As required versus fixed schedule analgesic administration for postoperative pain in children'. A 'Properties (Intervention review)' dialog box is open, showing the following details:

- Unique ID: 553013112812400504
- DOI: 10.1002/14651858.CD011404
- Review Group: SYMPT
- Review No: 182a
- Version No: 1.12
- Version Description: TC accepted
- Status: Active Withdrawn Inactive
- Stage: Title only Protocol Full review

The 'Full review' option is circled in red. The background shows the review information, including authors (Anna Hobson, Philip J Wiffen, Joy A Conlon) and dates (Assessed as Up-to-date: 02 July 2014).
